Lisa

I will forward this to Mark Gehrke and we will make contact.

Please thank your EPA consultant for his work in finding out about the customer in need. We will make every effort to inform the owners about the project and talk through the activities that will be completed

Thank you

Sounds like a great TV episode title, doesn't it? ☺ Anyway... I don't know if you are the one I need to contact or if it would be Tom or Mark, but here is the story:

Last week EPA was out trying to locate one of the GW wells that CTL-Thompson put in for your Phase II that is located on Amen Packaging property; they want to sample it for VB/I70 OU2. Since Amen (located at 4201 Brighton Blvd) is privately owned property, EPA contacted them before they went to look for the well. EPA told me that the owners expressed gratitude that initial contact was made and complained that in the past, contractors would just show up and wander the property without any prior notification. While trying to locate the well, EPA had the sewer plans which indicated their fence would be moved and other impacts. They became very upset about the news of the sewer project and said that they had not heard anything about it. Evidently they have "clean" rooms they use for packaging of special materials and were alarmed about the effects of construction on their operations. In short, these people feel very much in the dark and are upset about plans that will affect their property and business that has been moving forward without any inclusion on their part; they just want a place at the table. EPA said they were very nice and cooperative, and just wanted information. Can you please have someone give them a call and go over there just to talk to them? The owners are sisters, Bernadette O'Donnell and Anna Marie Hunt, and can be reached at 303 297 8600. Please let me know the outcome. Thanks!!
